

# A lot of good starts with a little swab

With NMDP<sup>SM</sup>, good goes a long way.

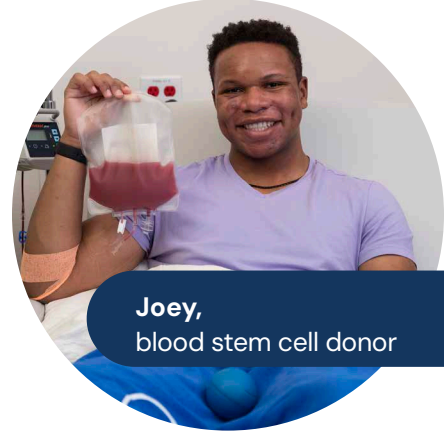

## Who we are

NMDP is a leader in cell therapy, helping find cures and save lives. Our focus is on patients with blood cancers or other disorders.

## What we do

With the help of blood stem cell donors from the world’s most diverse registry and our extensive network of transplant partners, physicians and caregivers, NMDP is expanding access to treatment so that every patient can receive their life-saving cell therapy.

Our recruitment team partners with community organizations, colleges/universities, volunteers and patients and their families to add more members to the NMDP Registry<sup>SM</sup>.

Joey,  
blood stem cell donor

## What you can do

Join the movement. Become a member of the NMDP Registry or encourage someone you know to join. We especially need more people between the ages of 18–35. Research shows that cells from younger donors lead to more successful transplants.

## Your cells. Their cure.

### Register

Answer a few questions to see if you’re eligible to join the registry.

### Swab

Submit your swab kit and we’ll add your tissue type to the NMDP Registry.

### Match

It may take months or years before you’re matched with a patient, but once you’re matched, you’ll have the power to help save a life.

### Donate

Patients and their families are counting on you to keep your commitment to donate, if needed. Turn your innate goodness into a limitless, life-saving gift.
